DETAILED ACTION

Claim Objections

1. Claims 3-5 and 13-20 are objected to because of the following informalities: Claims 3-5, 13 and 17 use the phrase "...for estimating the Doppler of the waveform". The claims would be clearer if "Doppler **shift**" was used rather than the short-hand recitation of just Doppler. Claims 14-16 and 18-20 are objected to because they are dependent on an objected claim. Appropriate correction is required.

2. Claim 1-7 are objected to because of the following informalities: In claim 1, there is a spelling error in line 6. Please change "ration" to ratio. Claims 2-7 are objected to because they are dependent on an objected claim. Appropriate correction is required.

Drawings

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 207, 242. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 110, 328, 330. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. The drawings are objected to because in figure 4, step 418 recites the removal of a sync portion, wherein paragraph 0019 describe removing an "alternating bit pattern". Moreover, the claims also describe removing a sync pattern. *Applicant is reminded that the steps described in the specifications, drawings, AND claims must correspond with each other. A recommendation is to amend the specifications and add the removal of the "SYNC" pattern to paragraph 0019.* Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate

Art Unit: 2634

changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

6. Claims 8-12 are allowed. Claims 1-7 and 13-20 would be allowable if the above objections are overcome.

The following is a statement of reasons for the indication of allowable subject matter: In claim 1, the limitations *"means for accumulating the power spectrum of said power spectrum providing, means when said determining means determines that the signal-to-noise ratio is not less than the threshold value, and means for estimating a symbol rate of the waveform based upon a power spectrum accumulated by said accumulating means"* could not be found in the prior art in combination with the other limitations of the claim.

In claim 8, the limitation *"means for adjusting the magnitude value of the correlation output to reduce an effect of a sync pattern of the waveform on the magnitude value of the correlation output"* could not be found in the prior art in combination with the other limitations of the claim.

In claim 13, the prior art failed to teach the combined apparatus as specified in the claim and specifications.

7. This application is in condition for allowance except for the following formal matters:

See above objections.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
